

Municipal Requirements Involving the Inspection of Residential Property

The following chart shows requirements regarding the municipal inspection of single-family homes and rental, multi-family properties. The chart also shows the fee that is associated with the inspection of a single-family home. Fees for apartment buildings and rental properties (not shown here) can vary widely based upon the number of units in a building. Check with the municipality for a schedule of fees.

This chart does not show licensure requirements for rental properties which several municipalities in Illinois include in their Codes. If you are a landlord or a property manager, you should become familiar with any license requirements that may exist in the municipality in which you own/manage rental, residential real estate. However, because of the preemption provision of the Real Estate License Act of 2000 there should be no requirement for a local license in order to be a property manager. If you believe that such a local licensing requirement exists, as opposed to a license requirement for the owner or something similar, please advise your local governmental affairs director so Illinois REALTORS® can review the local licensing requirement to determine if it is preempted by the Real Estate License Act.

Please keep in mind that while every effort has been made to ensure the accuracy of this guide, the information is subject to change by the respective municipality – please contact the respective municipality for the most up-to-date information.

The information in this chart is current as of May 2022.

Municipality	Phone No. for More Info	Single-Family Home Inspection Requirement; Fee; Other Requirements	Rental Property Inspection Information Requirement; Frequency
